The following instructions are intended to assist the user in the installation of the TRLRMP/MPXF welder cable carriers to the trailer frame. Please read all assembly instructions before installing the kit.

REQUIRED TOOLS
- 3/8" ratchet w/ 9/16" socket extension
- 9/16 open end wrench
- 25/64" Drill Bit
- Tape Measure

PARTS
Verify that all parts are accounted for. See Figure 1 and Table 1.

WORK SAFELY!
Only a qualified service technician with proper training should perform this installation. Follow all shop safety rules when performing this installation.

PREPARATION
1. Place the trailer in an area free of dirt and debris. Make sure it is on secure level ground with chock blocks underneath each wheel to prevent the trailer from rolling.
MOUNTING WELDER CABLE CARRIER

NOTICE

Newer TRLRMP/MPXF trailers built after October 2015 will have welder cable carrier mounting holes already pre-drilled. If trailer is not pre-drilled, refer to the Measuring Mounting Locations section.

1. Using a 9/16" socket and open ended wrench, secure the welder cable carrier to the trailer frame (Figure 2) using four 3/8-16 x 1" HHFS screws and 3/8-16 flanged nuts.

2. Torque the screws and nuts to 26 ft-lbs (35.3 N•m).

3. Mount and secure the welder cabler carrier cap as shown in Figure 2.

4. Repeat for the installation of the second welder cable carrier.

MEASURING MOUNTING LOCATIONS

1. Using a tape measure, make a mark toward the front of the trailer frame (Figure 2) 53.75 inches from the inside edge of the bumper.

2. Locate the welder cable carrier (P/N 59057) in the kit.

3. Align the welder cable carrier mounting bracket with the marking made in Step 1.

4. Before marking and drilling the mounting bracket holes, a Multiquip towing decal (P/N 34627) may need to be removed. Multiquip has provided a replacement decal.

5. Once positioned, mark the screw hole (4) locations as shown in Figure 2.

6. Using a 25/64" drill bit (Figure 2), drill out the four holes.

NOTICE

Depending on drill bit quality, pre-drilling the welding cable carrier mounting bracket hole with a smaller drill bit may be necessary.
