The following instructions are intended to assist the user in the installation of EPA-compliant fuel tanks to replace old-style tanks in the MTX Series Rammers. Please note your rammer serial number and perform the applicable installation procedure. Please read all assembly instructions before installing the kit.

REQUIRED TOOLS
- 5mm allen wrench
- 6 mm allen wrench
- 13 mm socket
- 13 mm open-end wrench
- Phillips screwdriver
- 5/16" nut driver

PARTS
Verify that all parts are accounted for (either Fuel Tank Kit A or B, depending on what you are installing). See Figure 1 and Table 1.

Figure 1. Fuel Tank Kits
WORK SAFELY!
Only a qualified service technician with proper training should perform this installation. Follow all shop safety rules when performing this installation.

NOTICE
The following tank replacement procedure applies to both kits (366910041KIT2 or 366910041KIT) unless otherwise noted.

OLD FUEL TANK REMOVAL

1. On the rammer, remove the 2 tapping screws under the hourmeter holder (Figure 2). Keep the screws as they will be used to reinstall the hourmeter holder later in the procedure. The hourmeter holder will be dangling. Prop it up where it is out of the way for the installation of the new fuel tank.

2. Remove the clamp holding the fuel line hose (for kit 366910041KIT2) or the 2 clamps holding the fuel line hoses (for kit 366910041KIT) and squeeze and pull out the hose(s) from the tank to disconnect. See Figure 3.

3. Remove the 3 screws and flat washers under the fuel tank. See Figure 4.

4. Remove the fuel tank from the rammer.
NEW FUEL TANK PREPARATION

For Kit A (366910041KIT2), refer to Figure 5. For Kit B (366910041KIT), refer to Figure 6.

1. On the new tank, install the strainer.

2. Install the packing on the strainer holder and install the strainer holder on the fuel tank using the 3 nuts and lockwashers.

3. Install the cap on the new fuel tank.

4. Connect the hose(s) to the strainer holder.
NEW TANK INSTALLATION

1. Install the new tank using the 3 sets of bolts, nuts, and lockwashers in the Attach Kit that comes with the Fuel Tank Kit.

For Kit A - Part Number 366910041KIT2:

1. Remove and discard the existing 3-3/4" hose. See Figure 9.

HOSE REPLACEMENT

1. Remove the side cover (link guard) of the engine to gain access to the hoses.

For Kit A - Part Number 366910041KIT2:

2. Replace with 3-3/4" hose (Part Number 366900110). See Figure 9.

**Figure 7. New Fuel Tank Installation**

**Figure 8. Side Cover Removal**

**Figure 9. Hose Removal**

**Figure 10. Hose Replacement**
For Kit B - Part Number 366910041KIT:

1. Remove and discard the existing 3-3/4" hose (Part Number 366900110). See Figure 9.
2. Replace with 3-3/4" hose (Part Number 366900110). See Figure 10.
3. Install spiral tube on the 24" hose (comes with the Primer Pump Kit).
4. The existing 24" hose on the rammer is tie-wrapped with other wires. Cut tie-wrap and remove spiral tube covering the wires. Keep spiral tube.
5. Remove and discard 24" hose, including spiral tube around it. See Figure 9.
6. Replace 24" hose with the hose in step 3. See Figure 10.
7. Reinstall the old spiral tube over the wires and hose and then secure with tie-wraps.
8. Reinstall the side cover.

HOURMETER/DECAL INSTALLATION

1. Reinstall the hourmeter holder, with the 2 screws previously removed, to the new fuel tank. See Figure 11.
2. Place the fire warning decal (P/N 920214100) as shown in Figure 11, if not previously installed.
