ENGINE INTERFACE CABLE AND DIAGNOSTIC SOFTWARE

The Mayco Model# C30HDG Concrete Pump utilizes a 50hp Zenith Gasoline Engine. The engine's ECU stores system fault events as Diagnostic Trouble Codes (DTC). The Check Engine Warning Lamp will illuminate on the control panel if a system fault has been detected.

Using a laptop, interface cable and software the service technician can interface with the engine's ECU for retrieving the DTC information.

Following are the service capabilities in utilizing the interface cable and software.

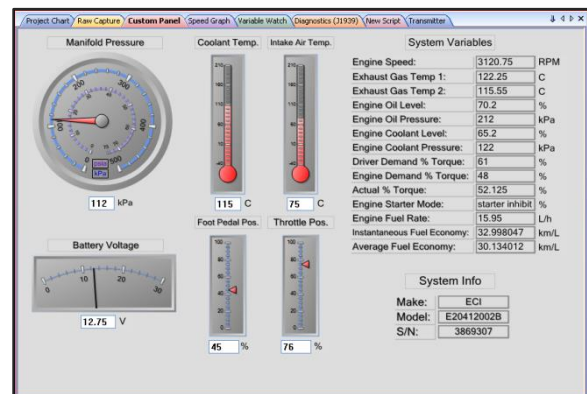

- Clearing of all codes, including historical codes
- Real-time viewing of all active engine parameter including LPG gaseous pressure.
- Data plotting and recording of engine parameters.
- Quickly determines engine malfunction.
