

SPIDER PLATE IMPROVEMENT

HTXD6i & STXD6i models with six blade spider

MQ Part # 23341 (spider assembly)

A change was made to the spider plate to strengthen the area shown below

Production change begins with serial # **1204**

- *The radius cut where the spider hub meets the spider legs has increased to 3/16"*
- *Spider serial numbers are stamped into the top of the spider hub.*

This photo shows the
OLD RADIUS cut.

NOTE: The spider is shown without the sleeve installed on purpose, to allow the radius to be shown for this document. The serial number can be used to determine if the spider has the new radius cut.

This photo shows the
NEW RADIUS cut.
