SPRING CYLINDER DESIGN CHANGE

As part of Multiquip's commitment to continuous product improvement the guide cylinder design of the MTX60 was recently changed. A machined taper was removed to increase cylinder thickness and improve component durability.

ITEM#	DISCONTINUED P/N	DESCRIPTION	NEW P/N
12*	368347280	Spring Cylinder, MTX60	368347281

**Reference Guide Cylinder Assembly in MTX60 parts manual on following page*

Units affected - Serial Number U-4269 and higher.

Externally, the spring cylinders will appear the same. To visually distinguish the two designs inspect the inside of the cylinder walls. A machined taper will be visible along the inside diameter of the discontinued cylinder. The new design, which does not use the taper, has a smooth surface inside the cylinder.

For list price and availability, contact the MQ Parts Department or online at www.multiquipparts.com.
