## HOSE REPLACEMENT TOOL

The 50' hose is attached during the initial assembly, and if there is a necessity due to wear, cutting or damage to change out the standard 50' hose (MQ Part # 59157) common household tools may not be enough. The hose fitting may be very difficult to negotiate with a standard open-end 1-3/8" wrench. Obtain the following tools below for easy removal and install.

### Tools Required:

- 1/2" Driver Ratchet
- 1 3/8" Open End Crow Foot Wrench

Hose Reel Drum Assembly

50' Hose
